How to Access the Active Learn Maths Platform

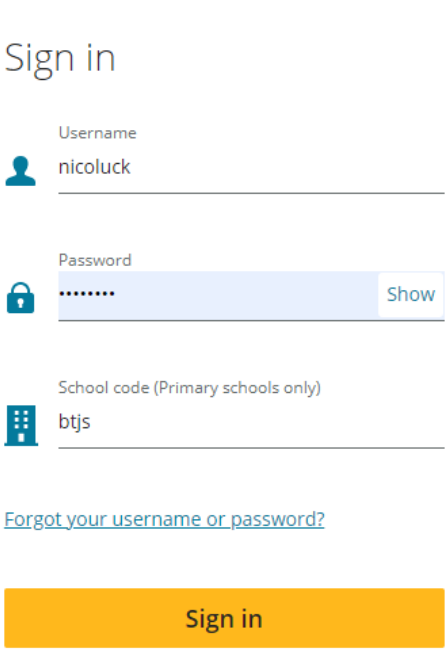

Search for **Active Learn Primary**. In previous years, a small number of parents experienced difficulties when trying to log in via Google. Should this be the case, please use a **Microsoft** browser to search for Active Learn.

Ensure that you select www.activelearnprimary.co.uk **not** www.pearsonactivelearn.com

Once you have selected the correct site, you will be asked to log in.

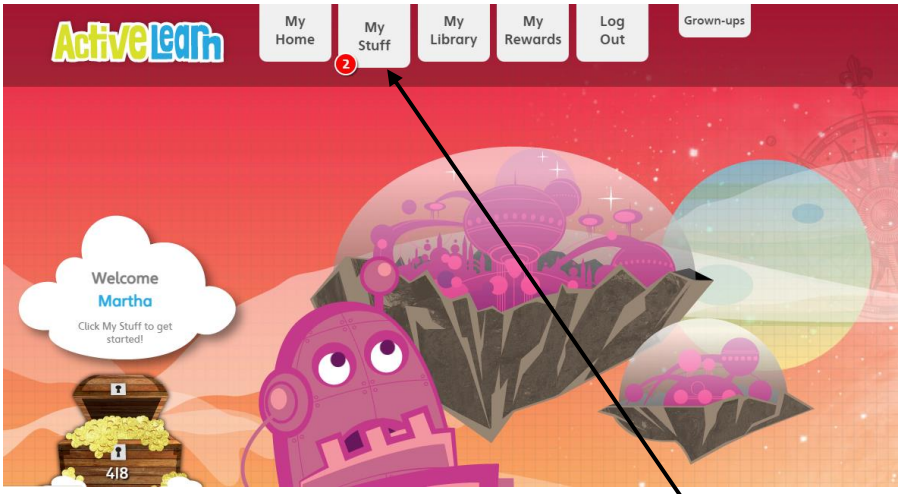

Your child's class teacher has provided you with a username and password. The school code for all pupils is btjs.

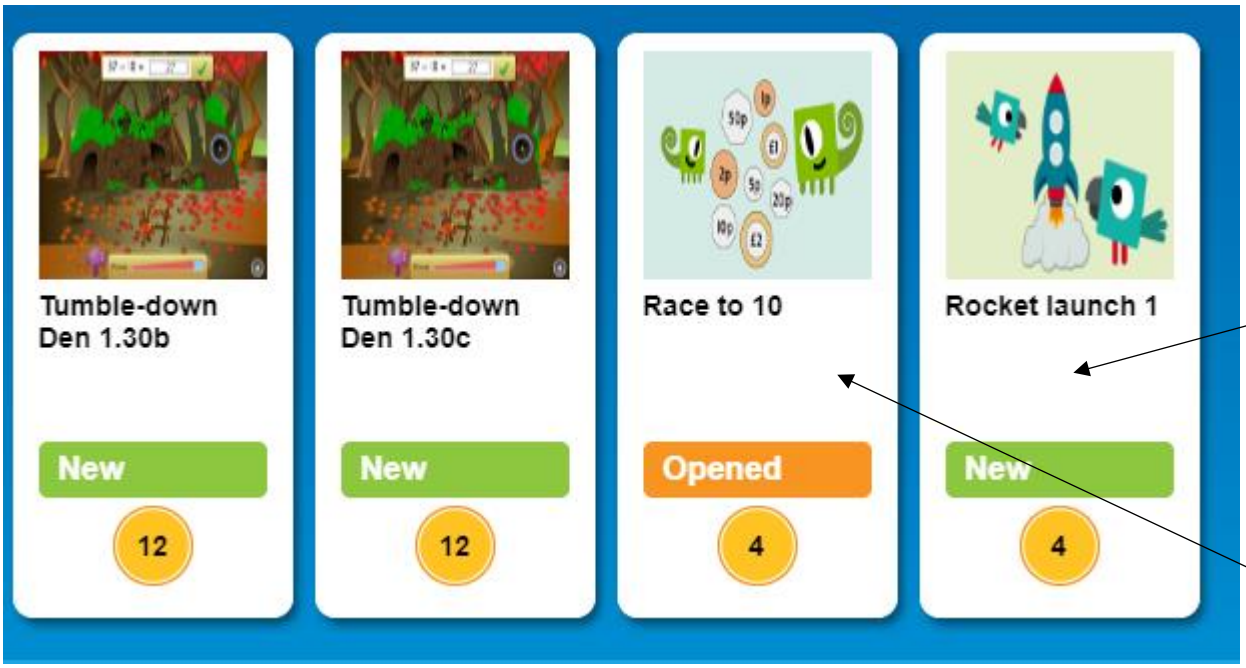

Your child's password is **Maths22**

In almost all cases, usernames are the first 4 letters of a child's first name and the first 4 letters of their surname all lower case with no spaces.

If you have logged in successfully, you will see the following screen:

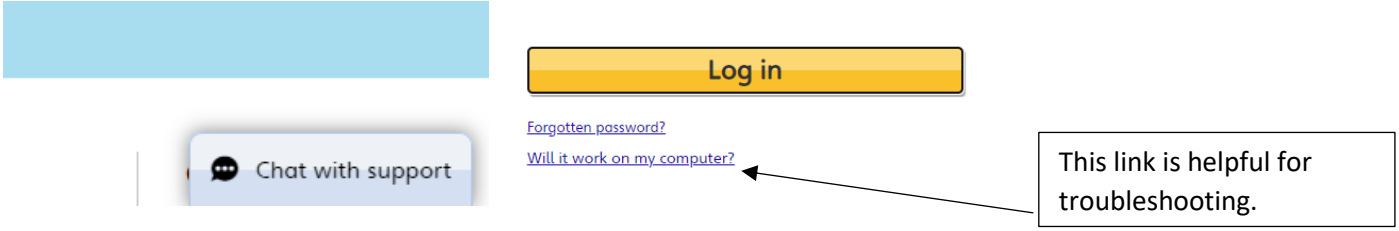

Maths resources can be accessed by selecting 'My Stuff'. There you will find allocated Active Learn games and (for Years 1&2 only) School Jam homework. At the moment School Jam activities seem to be at the end of scroll through menu. We are in contact with Pearson to see if there is any way these can appear at the beginning, as we appreciate this would make them quicker and easier to find.

School Jam homework is different from the Active Learn games – it doesn't have a number after it.

Troubleshooting:

If your user name doesn't work, please contact your child's class teacher. Alternatively, use the chat button in the bottom right hand corner to **contact Pearson directly**. They are usually very helpful and can solve issues quickly.

This link is helpful for troubleshooting.
